

MOHAMMED ANWAR RASHED

Senior IT, Infrastructure & Network Project Manager | PMP® | CCNP Enterprise

Riyadh, Saudi Arabia | +966 56 138 4018 | engmohamedRashed10290@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

PMP-certified Senior Project Manager and CCNP Enterprise engineer with 12+ years of experience delivering telecom and enterprise network infrastructure programs across Saudi Arabia. Currently leading STC implementation delivery at Business Management Company (BMC), managing a portfolio of 180+ implementation charters while overseeing multi-vendor delivery teams, cost estimation, executive reporting, and PMO governance. Combines deep hands-on networking expertise (SD-WAN, Routing & Switching, MPLS, and wireless) with strong risk management and digital transformation delivery to ship high-quality projects on time and within SLA commitments — in direct support of Saudi Vision 2030 infrastructure objectives.

CORE COMPETENCIES

IT & Infrastructure Project Management • Project Implementation & Delivery • PMO Governance & Reporting • Cost Estimation & Budget Control • Digital Transformation • Multi-Region & Multi-Vendor Delivery • Executive Reporting & Power BI Dashboards • Risk & Issue Management • Stakeholder & Vendor Management • Resource & Capacity Planning • Agile & Waterfall Methodologies • SLA / KPI Management • Change Management • Procurement & Contract Coordination

KEY ACHIEVEMENTS

- Led end-to-end delivery of **180+ STC network implementation charters** across four regions of Saudi Arabia, coordinating multi-vendor teams under strict SLA commitments and achieving **80–90% on-time delivery**.
- Managed cost estimation, budget forecasting, and financial tracking across implementation projects exceeding **SAR 10M**, maintaining forecast-to-actual cost variance within **±15%**.
- Built executive **Power BI dashboards** giving leadership real-time visibility into delivery status, SLA compliance, and risk exposure — reducing manual reporting effort by **50–70%**.
- Significantly reduced deployment delays through **proactive planning, standardized PMO governance, and structured escalation management**.
- Delivered large-scale enterprise infrastructure programs spanning Cisco, Huawei, MPLS, SD-WAN, and wireless technologies across **100+ sites**.
- Coordinated **cross-functional teams of 20+ engineers** across multiple regions, managing project execution, resource allocation, stakeholder communication, and escalation.

PROFESSIONAL EXPERIENCE

Implementation / Senior Project Manager — STC Projects

Oct 2022 – Present

Business Management Company (BMC) — Riyadh, Saudi Arabia

- Lead end-to-end implementation and delivery of enterprise network infrastructure projects for STC across multiple regions of Saudi Arabia.
- Manage 180+ implementation charters covering planning, cost estimation, scheduling, execution, risk management, and handover.
- Produce executive reporting and Power BI dashboards covering delivery status, SLA/KPI compliance, resource utilization, and risk exposure.
- Coordinate engineers, subcontractors, vendors, and customer stakeholders across multiple regions to ensure successful delivery and adherence to project KPIs and SLAs.
- Manage executive stakeholder communications, governance reviews, and delivery escalations with STC and internal leadership.
- Deliver enterprise solutions involving Cisco, Aruba, Huawei, MPLS, SD-WAN, and wireless infrastructure technologies.

- Drive PMO governance, resource allocation, and operational-readiness activities, applying PMP and Agile/Waterfall best practices to support digital transformation initiatives.

Network & Solutions Engineer

Dec 2015 – Sep 2022

Business Management Company (BMC) — Riyadh, Saudi Arabia

Project: Bank Al-Jazira — Internal Campus Operations & Maintenance

- Supported mission-critical banking networks, maintaining **99.9%+ service availability** through proactive monitoring, troubleshooting, and infrastructure upgrades.
- Maintained operational continuity for business-critical banking services and resolved network incidents efficiently.
- Coordinated operational reporting, project coordination, and stakeholder alignment; supported wireless and enterprise infrastructure across multiple environments.

Project: General Authority of Zakat and Tax (GAZT) — L2 NOC Engineer

- Monitored MPLS network performance and operational stability across nationwide branches (20+ sites).
- Managed technical documentation, project coordination, and infrastructure support for enterprise environments.

Design Engineer — Data & WiFi Department

Prior to 2015

Mobily & Saudi Telecom Company (STC)

- Conducted wireless site surveys and enterprise infrastructure design across multiple environments.
- Performed RF planning and wireless coverage analysis for enterprise WiFi deployments.
- Coordinated wireless implementation, access-switching deployment, technical documentation, and project handover.

CERTIFICATIONS

- PMP® – Project Management Professional (PMI) | Credential ID: 12475280
- Cisco CCNP Enterprise — ENCOR (350-401) & ENARSI (300-410)
- Cisco SCOR (350-701) — Security Core • Aruba Mobility Bootcamp • VMware SD-WAN (VeloCloud)
- MCSA – Server Administrator • Saudi Engineering Council (SEC) Membership • English Certification – IBI

SKILLS & TOOLS

Project Management: Project Implementation & Delivery, Cost Estimation & Budget Control, PMO Governance, Multi-Region Delivery, Risk Management, Stakeholder & Vendor Management, Resource Planning

Technical Expertise: Cisco Routing & Switching, MPLS & SD-WAN, Wireless RF Design & Optimization, Enterprise Infrastructure Deployment, Network Security (SCOR)

Reporting & Analytics: Executive Reporting, Power BI, Dashboarding, Advanced Excel, Pivot Tables, KPI/SLA Reporting

Tools & Platforms: MS Project, Primavera P6, Power BI, Advanced Excel, SolarWinds, Cisco Prime, VMware SD-WAN Orchestrator, Visio, AirMagnet, iBwave, Remedy

EDUCATION & LANGUAGES

B.Sc. in Communications & Electronics Engineering — Tanta University, Egypt (GPA 3.2 / 4.0)

2011

Languages: Arabic (Native) • English (Professional) • French (Beginner)
